

LEASA LUDVIGSON

Cybersecurity Analyst | Risk Analysis | Compliance | Financial Operations

307-679-3995 | leasa.m.lud@gmail.com | Greeley, CO | linkedin.com/in/leasa-ludvigson-9b330b187

SUMMARY

Detail-oriented professional transitioning into cybersecurity with over seven years of experience in financial operations, insurance, compliance, customer service, reporting, and process improvement. Experienced investigating discrepancies, analyzing data, maintaining documentation, training team members, and working with confidential information. Completed the Fullstack Academy Cybersecurity Bootcamp with hands-on experience in Linux, Windows, incident response, log analysis, network security, AI-assisted investigations, and security operations fundamentals.

TECHNICAL SKILLS

Security Tools: Splunk, Kali Linux, Wireshark, Nmap, Snort, Metasploit, Meterpreter, PESTudio, VirusTotal, OpenSSH, Ollama, TinyLLaMA

Networking: TCP/IP, DNS, DHCP, Network Security, OSINT, Reconnaissance, Log Analysis, Threat Detection, Incident Response, Risk Assessment

Operating Systems: Linux, Windows, Android, Virtual Machines, VirtualBox

Programming Languages: Bash, PowerShell Fundamentals, Command Line

Certifications: CompTIA Security+ (in progress, expected completion 2027); Fullstack Academy Cybersecurity Bootcamp Certificate of Completion (June 2026)

TECHNICAL PROJECTS

AI-Assisted Insider Threat Investigation Simulator | Capstone Project

- Built a simulated insider threat investigation using authentication, file access, and PowerShell logs; combined evidence into one investigation file and used ChatGPT and TinyLLaMA to analyze suspicious behavior.
- Validated AI findings against source logs, assigned a high-risk score, and produced a SOC-style incident report with a timeline, indicators of compromise, business impact, and mitigations.

Windows OpenSSH Honeypot Lab

- Configured OpenSSH in a Windows lab environment and connected from Kali to generate and review authentication activity in Windows Event Viewer.
- Created a Windows Defender Firewall rule to block a specific remote IP and verified from Kali that subsequent SSH access was denied.

Malware Analysis Lab

- Performed static and dynamic analysis using PESTudio and VirusTotal; identified UPX packing, self-modifying sections, and suspicious imports including VirtualProtect and GetProcAddress.
- Documented a 42/72 detection ratio and mapped observed behavior to MITRE tactics including execution, defense evasion, and command and control.

Footprinting, OSINT, and Network Scanning Lab

- Performed passive reconnaissance with WHOIS, DNS lookups, Netcraft, and Google dorking to identify public infrastructure, subdomains, documents, directory listings, and technology exposure.
- Scanned a Metasploitable VM with Nmap, identified more than 20 open ports and insecure services such as FTP and Telnet, and recommended patching, encryption, firewalls, and service reduction.

Android Penetration Testing Lab

- Built an Android 9 virtual lab, created and installed a test APK payload, and established a Meterpreter session in a controlled environment.
- Verified system information and documented post-exploitation functions including contact access behavior, screen sharing, hidden application behavior, and geolocation prerequisites.

AI-Assisted SOC and Phishing Behavioral Analysis

- Analyzed suspicious Office-to-PowerShell behavior, attacker use of native Windows tools, and behavioral indicators associated with phishing and malware execution.
- Evaluated how AI can summarize logs and accelerate SOC investigations while documenting false-positive, hallucination, analyst-validation, and layered-defense risks.

LEASA LUDVIGSON

EXPERIENCE

Financial Coordinator | Timberline Smiles (Formerly Crane & Seager Orthodontics) | Loveland, CO

March 2022 - Present

- Manage insurance verification, claims billing, patient receivables, payment review, and delinquent account follow-up to support profitability and accurate financial operations.
- Reduced insurance delinquency from approximately \$153,130 to \$19,018, about an 88% decrease, through AR trackers, claim corrections, account review, and proactive follow-up.
- Submit, review, correct, and resubmit insurance claims through Dolphin, practice management systems, and clearinghouse workflows while maintaining detailed documentation.
- Generate weekly insurance and collections reports used by leadership to monitor office performance, identify trends, and prioritize follow-up.
- Train team members on insurance requirements, documentation standards, workflow updates, and process changes.
- Maintain HIPAA-aware handling of confidential patient and financial information while managing contracts, autopay, EOD/EOM balancing, reporting, and account setup.

Virtual Assistant / Assistant Coach | Anthony Bradley Fitness | Remote

December 2021 - December 2025

- Built GoHighLevel websites, funnels, automations, forms, and CRM workflows while supporting client onboarding and technical setup.
- Managed client check-ins, dashboard review, Skool setup, Airtable tracking, reporting, and software support for fitness and business-coaching clients.
- Created SOPs, onboarding documentation, Canva graphics, social media content, and process improvements to support business growth.
- Managed and trained virtual assistants supporting website design, client setup, and administrative workflows.

Customer Service Representative | US Law Shield | Remote

August 2021 - March 2022

- Completed 100-150 outbound calls daily for member support, billing, past-due balances, account questions, and customer follow-up.
- Resolved customer concerns while maintaining detailed CRM documentation and meeting productivity and service expectations.

Licensed Customer Service Representative | Bamboo Insurance | Midvale, UT

January 2021 - August 2021

- Handled 60-70 inbound calls daily regarding California homeowners policies, mortgage requests, coverage questions, and policy documentation.
- Reviewed policy changes, submitted underwriting requests, and explained coverage and regulatory requirements to customers and mortgage companies.

Licensed Customer Service Representative / Assistant Trainer | Teleperformance USA | Remote

August 2019 - January 2021

- Handled 60-70 inbound calls daily assisting customers with policy questions, changes, coverage options, and complex account concerns.
- Processed vehicle and driver policy modifications while ensuring compliance with company guidelines and accurate documentation.
- Assisted in training new hires on customer service systems, procedures, documentation, call handling, and performance best practices.

General Manager | Neesee's Dresses | Cheyenne, WY

April 2017 - May 2019

- Helped grow a startup into a successful online retailer by improving order accuracy, shipping workflows, inventory tracking, website operations, and customer service processes.
- Implemented ShippingEasy, warehouse tracking, product-code workflows, and Shopify website operations to support daily uploads, seasonal campaigns, and sales funnels.

EDUCATION

Fullstack Academy Cybersecurity Bootcamp

Certificate of Completion | 189 hours of instruction | June 22, 2026

- Relevant coursework: SOC operations, incident response, Splunk, Linux, network security, digital forensics, vulnerability management, and threat intelligence.

Evanston High School | High School Diploma | 2014
